

I oppose HR 4026. We pay for the services we receive from satellite radio. If we wanted it otherwise, we would have stuck with the regular channels on AM and FM regulated by you, the FCC. We utilize the channels offered by XM, in fact, we expect to have them. That is why we pay, so we can hear what we want and get what we can not get from regular radio. We do not pay monthly for satellite radio so we can hear what the National Association of Broadcasters wants us to hear. Regulate AM and FM, but leave XM alone. We all work hard for our money, please allow us to get what we want and what we pay for.
